This settlement is for the COMPETITORS NOT the consumer !!! I always thought a free market system would let the market decide. We are not a free market system when the government dictates the market especially when it has been obvious over the last 4 years of this lawsuit that the competitors are using our own government to gain their own advantages. Not many consumers in the US today believe this lawsuit has anything to do with them. We all know it has to do with jealousy and posturing by the competition. Please stop this nonsense and let consumers decide what is best for them. Our dollar speaks loudly in a free market system.
